DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claim 1, in the reply filed on 7/8/05 is acknowledged.
2. Claims 2-4 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/8/05.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Schmid et al (US 3,440,909).

Schmid et al discloses a safety device for stamping machines comprising all the elements claimed including, inter alia, a movable lower support base (e.g. 24); a punch (e.g. 30); a lower die assembly (e.g. 22); and a vertically movable upper die (e.g. 11). See whole patent.

Regarding the work, this has not been given significant patentable weight, since it has been held that expressions relating the apparatus to contents thereof during an

Art Unit: 3724

intended operation are of no significance in determining patentability of the apparatus claim, *Ex parte Thibault*, 164 USPQ 666, 667 (Bd. App. 1969), the inclusion of material or article worked upon by a structure being claimed does not impart patentability to the claims, *In re Young*, 75 F.2d 966, 25 USPQ 69 (CCPA 1935), and the material or article worked on by an apparatus does not distinguish the apparatus from prior art which works on a different material or article if the apparatus otherwise is met by the reference, *In re Casey*, 152 USPQ 235 (CCPA 1967).

Conclusion

5. Nagao et al, Taijonlahti et al, Kooken et al, Bianchi et al, Haack, Riley, Delio et al, Wolnosky, Andris, Schmid '292, Wakelee, and Gavurin are cited as pertinent art.
